

Aluminium duranorm® – new shapes, new colours

HOPPE is pleased to present six new aluminium series in the duranorm® product line. The new series make an impression with a particularly attractive benefit/price ratio.

A range of shapes and colours are available, and for the first time, our portfolio now also includes handle sets made from aluminium with chrome- and gold-coloured surfaces. To achieve this new look, we rely on a tried-and-tested procedure that is also applied in the automotive industry. The result is a functional yet decorative coating that not only looks good, but is also resistant to corrosion.

The products in the new duranorm® series are brand products manufactured by HOPPE in accordance with high standards. All production facilities of the HOPPE Group in Germany, Italy and the Czech Republic are certified according to DIN EN ISO 9001:2008 (quality) and DIN EN ISO 14001:2009 (consideration for the environment).

The advantages at a glance:

- Attractive benefit/price ratio
- Corrosion-resistant aluminium sets
- Available with chrome and gold-coloured surfaces
- Certified brand quality

In addition, duranorm® products are also covered by our 10-year operational guarantee.
