013S/U34 Lockable TBT*	38mm	7						8149825

* = Tilt before Turn

Separate 40mm screw pack will be added for each window handle placed on order unless noted below

⁽¹⁾ - 40mm screws are included in the box with each window handle

Spindles are not removable

The Lockable window handle can only be operated when the locking cylinder is unlocked by the key.

The Lockable TBT window handle function's between the closed and tilted positions freely, meaning that, although unlocking of the cylinder is not necessary, ventilation can occur. In the 90° tilted position, a blocking mechanism comes into operation so that turning the handle further to the 180° opening position is only possible once the cylinder is unlocked by the key.

Lead times may vary and are subject to supply and demand at the time of the order.

Indicates the item is a **HOPPE QUICK SHIP** item and is targeted for shipment within 2 weeks, for orders up to 10 openings.

Glossary

	Secustik® – Secustik® window handles contain a patented jamming-device which provides integrated security. This makes it more difficult to move the window fitting unlawfully from outside.
	VarioFit® – Window handles with VarioFit® adjust their spindle length to correspond to the depth of the window profile with which they are being used.
duraplus®	duraplus® - Offers a great variety of technically innovative products with external certification in various designs and finishes
duravert®	duravert® - Offers a choice of exclusive designs, precious materials and special packaging
duranorm®	duranorm® - Offers products at aggressive prices for standard applications
