

## ***HOPPE Antique Finishes***

Antique Brass (F73), Antique Nickel (F44, F44-R)

Antique Finishes from HOPPE North America deliver the unique aesthetic of an aged finish for the discerning hardware connoisseur. Intended to simulate the natural and inconsistent qualities that come with tarnish and age, Antique Brass and Antique Nickel finishes are the result of carefully handcrafted process that have been thoroughly refined. Antique Brass and Antique Nickel finishes by HOPPE will maintain their original appearance and are not considered “living” finishes. These finishes feature coatings that protect each surface from tarnish. Antique Nickel is also available as a Resista<sup>®</sup> finish covered by the Resista<sup>®</sup> Limited Lifetime Finish Warranty.

When considering Antique Finishes, the user should be aware these finishes will exhibit variation in color and shade just as an actual tarnished piece of brass or nickel would show. Curved and shaped surfaces will show greater contrast and highlights of golden brass or shiny nickel as shown above. Slight variations can also be expected from one piece to the next. HOPPE maintains a careful balance of consistency blended with purposeful variation to yield the desirable aesthetic of an Antique Finish. The result is a unique hardware piece created with an artisan’s touch.

If more consistent appearance is desired, HOPPE recommends Polished Brass (F71, F77-R) in place of Antique Brass and Satin Nickel (F42, F42-R) in place of Antique Nickel. Visit [www.us.HOPPE.com](http://www.us.HOPPE.com) for further details on all of our hardware solutions.
