Add some special touches! Trendy finishes by HOPPE
For all HOPPE door- and window handles ...
Add some special touches!
Trendy finishes by HOPPE

When it comes to furniture and home accessories, one trend has already been around for some time and has now broken into the world of architectural fittings too – door and window handles in dark or metallic tones! HOPPE is now adding to the colour palette for its handles of excellence with eight new finishes. Charcoal and black as well as brass and copper – each available in either a glossy or satin effect.

The dark architectural fittings in charcoal and black will really give rooms that special touch – you can enhance colourful details of your furniture or lend even more elegance to a fairly muted tone-in-tone interior design style – set against dark door leaves, for instance.
The metallic copper and brass tones give rooms a cosy and inviting feel. The warm copper goes well with natural wood shades and brass-coloured finishes suit luxuriously decorated homes, for instance, thanks to their gold-like shade, but also suit simpler Scandinavian-inspired living.

Wherever the new HOPPE finishes are used, their high-quality appearance is long-lasting, even with intensive use or in harsh climatic conditions. Architectural fittings with the new HOPPE finishes have Resista® and come with a ten-year guarantee. They are subject to continuous quality inspections and meet the requirements of the European standard EN 1670 when new.

The new finishes are available for the HOPPE series Amsterdam, Dallas and Los Angeles. For interior doors, a variety of rose versions – in addition to the standard versions, the range also includes mini and flat roses – ensure even more design options to suit individual interior design styles. Quick-Fit and Quick-FitPlus enable installation to be done easily, quickly and precisely. In addition to Secustik® handles, the window range also features slide-and-tilt and lift-and-slide versions for French and patio doors as well as balcony doors – so there’s now nothing stopping you having a uniform handle design throughout your house.
Resista® – HOPPE’s surface guarantee

HOPPE Resista® hardware has a 10-year surface guarantee (please see “Guarantee” on the left).

They are therefore ideal for coastal areas and highly frequented areas such as public buildings, shops and hotels.

All products with the Resista® surface guarantee have undergone continual quality testing and, when new, conform to the requirements of the European standard EN 1670 ("Building hardware – Corrosion resistance – Requirements and test methods").

Care:
Dirt can easily be removed with a damp cloth. The use of caustic cleansers or chemicals should be avoided. No further special care is needed.

Brass sets with chrome finish in the duravert® and duraplus® product lines also have the HOPPE Resista® surface guarantee, providing 10 years’ cover on the surface of these products, too.
